Title: Toner Cartridge for Electrophotographic Recording Apparatus

Application No.: H01-84293

Application Date: July 18, 1989

Inventor: Tetsuo Yamanaka, Ricoh, 1-3-6 Nakamagome, Ohta-ku, Tokyo

Applicant: Ricoh, 1-3-6 Nakamagome, Ohta-ku, Tokyo

Agent: Shunsuke Nakao (Benrishi)

I claim:

1. An electrophotographic recording apparatus having a toner cartridge for the electrophotographic recording apparatus for storing toner to be supplied and having an opening covered with a removable sealing material, said toner cartridge being provided with a see-through section to allow for the color identification of the color toner stored therein.
2. An electrophotographic recording apparatus having a toner cartridge for the electrophotographic recording apparatus for storing toner to be supplied and having an opening covered with a removable sealing material, said toner cartridge being provided with a winder to take up said sealing material, and said sealing material having an adhesive material on the inner surface at the terminus thereof to allow the toner to adhere thereto.

Brief Description of the Drawings

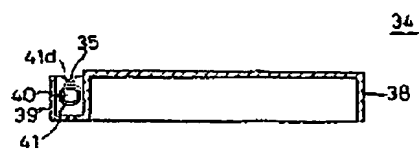

FIG. 1 is a plan view of a toner cartridge according to the present invention; FIG. 2 is a longitudinal section thereof. FIGS. 3 and 4 are longitudinal sections of other examples of the present invention. FIG. 5 is a longitudinal section of the toner cartridge shown in FIG. 4 showing the state when the sealing material is taken up. FIG. 6 is a schematic view of a laser printer having the toner cartridge of the present invention.

34 – toner cartridge, 35 – color toner, 40 – take-up roller, 41 – sealing material, 41d – adhesive material
